

These instructions are for Opera 10.62 browser and mail program.

Open Opera.

Click on the "Tools" menu and select "Mail and Chat Accounts..."

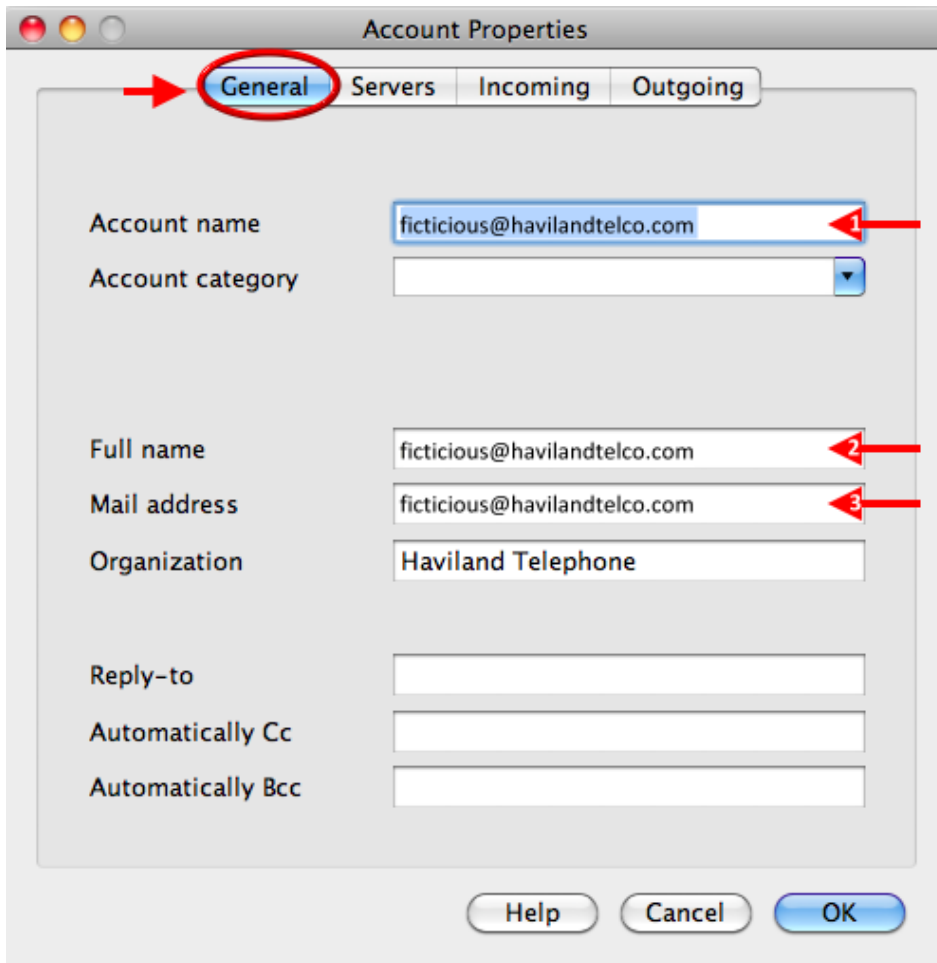

1. Select "POP" type.
2. Click "Edit".

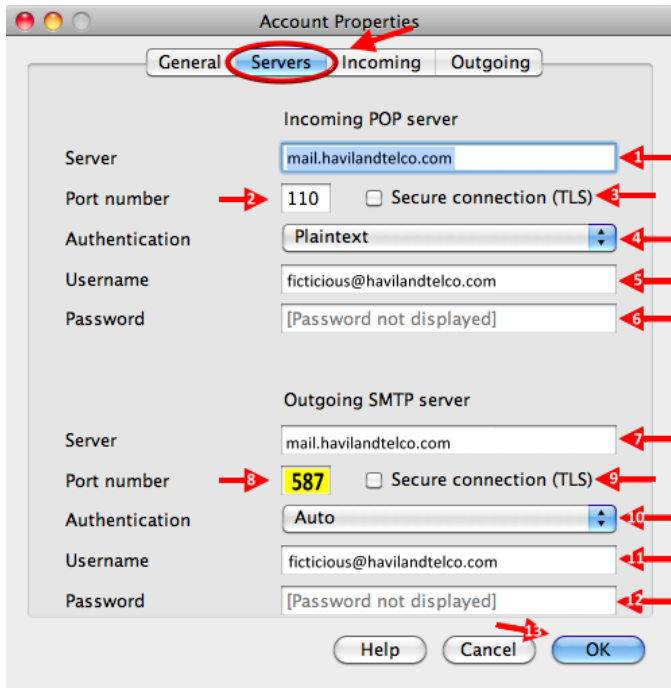

In the "General" tab:

1. Make sure your full email account is typed in "Email Account", (It should be something like fictitious@haviglandtelco.com, not just "fictitious" or "Fict Icius").
2. Make sure your full email account is typed in "Full Name", (again, it should be something like fictitious@haviglandtelco.com).
3. Make sure your full email account is typed in "Mail Address", (again, it should be something like fictitious@haviglandtelco.com).

Click on the "Servers" tab at the top of the box.

1. Make sure "Server" is: mail.havilandtelco.com
2. Verify the "Port Number" is 110.
3. Verify "Secure Connection (TLS)" is NOT checked.
4. Set "Authentication" to "Plaintext".
5. Make sure "Username" is your full email account (i.e. fictitious@havilandtelco.com).
6. Type in your password.
7. Make sure "Server" is: mail.havilandtelco.com
8. Change "Port Number" to "587".
9. Verify "Secure Connection (TLS)" is NOT checked.
10. Set "Authentication" to "Auto".
11. Make sure "Username" is your full email account (i.e. fictitious@havilandtelco.com).
12. Type in your password.
13. Click "OK".

You should be back at the "Manage Accounts" screen.

Click "Close". You are finished. Test by sending and receiving.
